TO WHOM IT MAY CONCERN

30.11.2007

EUROIMMUN is a German based manufacturer of medical diagnostics for the serological diagnosis of autoimmune diseases, infectious diseases and allergies.
At present EUROIMMUN has 500 employees in Germany, 630 worldwide.

I herewith confirm that Mrs Jan Weatherburn (Bayside Accounting) was appointed as accountant for EUROIMMUN's subsidiary in South Africa from September 2005 until November 2007.

She was responsible for our accounts according to South African legislation and to the concern's internal guidelines. Jan has prepared the payroll and dealt with the South African Revenue Service on our behalf.

Being part of a worldwide concern, the annual financials had to be audited according to international standards. The files and reports for the audit were prepared by Jan.

I have always been very pleased with Jan's quick and effective work. It was a pleasure working with her and I wish her all the best for her future in Australia!

With best regards,

Claudia Albrecht
